#### Narrative

CP advised of some recent damage to a company owned trailer. On 04-05-89 there were two tires damaged, apparently slit with a knife. At that time the trailer was parked behind the building, inside the locked enclosure.

05-01-89 they took the loaded trailer out. While on that run the electric trailer brakes failed to operate, nearly causing a serious crash. Upon inspection the wires near the brakes had been tampered with. Some pieces of wire were missing, some shortened several inches. CP advised that the trailer had been last used on 04-29 and the brakes had been operable then.

CP advised that he did have a suspect in these incidents. Some employees who wished to remain anonymous and refused to speak on the record had named a Bob Schmersal who works on the third shift and was working Sunday night-Monday morning. He has been in trouble with the company recently. He had been a driver, but due to some difficulties, had been disqualified. He appealed the disqualification, but lost the appeal sometime last week.

Due to the nature of the last incident, and the danger it posed, the company will prosecute if someone is caught.

#### Narrative

Mr. Caprilla of Yocum Realty arrived on station and advised he arrived at Orbitron at approximately 07:00 hrs. on 07-19-94 to let the Federal EPA inside the building. Upon his arrival, he found several doors kicked in. The door going into the broiler room and two doors going into a storage room were kicked in. is unknown if anything is missing from the building.
